

Changing the way COVID-19 medical records are entered and shared

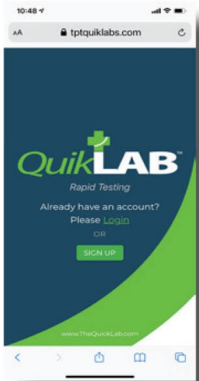

TPT MedTech has developed two apps to streamline COVID-19 testing and verifying. QuikLABTM, an advanced technology platform that allows for appointment scheduling, data entry of patient COVID-19 tests results and vaccination entry. This data is then shared with the patient and the patient can then share the data with QuikPASSTM to other entities.

The QuikLABTM application keeps track of a patient's COVID-19 medical status with date timers for test validation and countdown clocks for when a vaccination is due or expired.

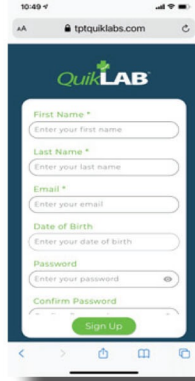

All data is scanned from bar codes on tests and vaccinations. This allows for accurate data entry and limits human errors.

The QuikLABTM application is fully HIPAA Compliant

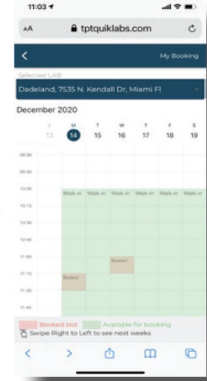

A user signs into the app

New accounts fill in all info

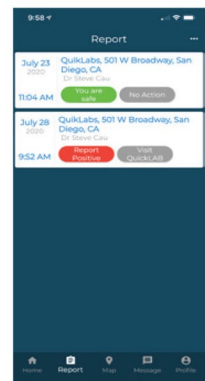

Appointment for COVID-19 test is made

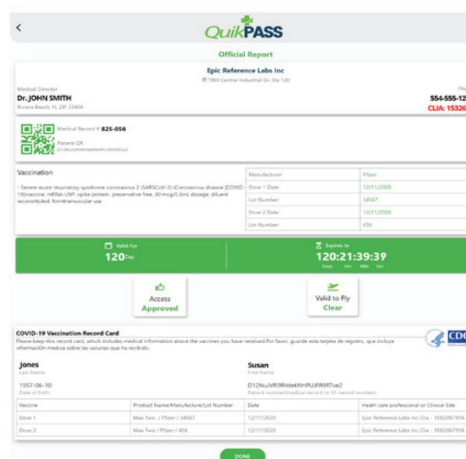

A QR Code is generated specific to that patient

Upon arrival the patient present the QR code.
No personal information is shared

Test results are sent back to the app within 30 minutes

HIPAA Compliant data is shared with entities that need proof of negative COVID-19 test or vaccination

QuikPASS™ is a complete, Integrated HIPAA Compliant portal for tracking COVID-19 test results and vaccination doses administered by participating providers, Validation allows for government ID to be displayed for 10 seconds when authorized by the user.

Mobile COVID-19 Testing Application

ADVANCED DATA ENTRY AND COMMUNICATION

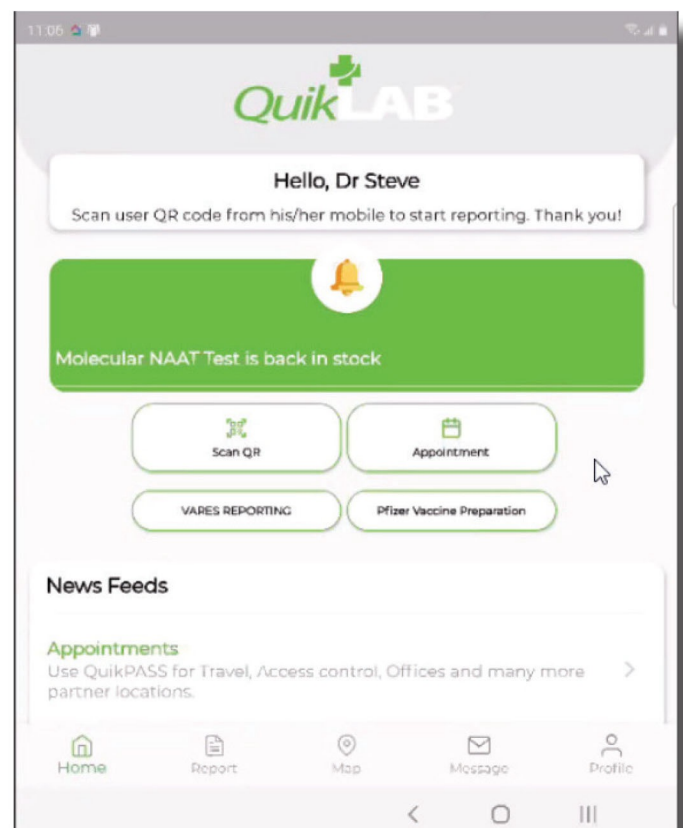

The TPT MedTech QuikLAB™ is designed and manufactured to provide on-site COVID-19 testing services to hospitals, businesses and communities where rapid incremental infrastructure is needed, including during emergency situations like pandemics and other natural disasters.

Now you can get all the tests you need done out-of-building, 24/7, eliminating the logistic challenges of conventional off-site testing, saving you both time and money!

TPT MedTech is recognized for its strong engineering expertise, advanced medical systems and innovative solutions. The QuikLAB™ is made in the USA and offers a high-quality, cost-efficient and climate-controlled turnkey testing lab. Our engineering teams will work with you to build your QuikLAB™ to your specific requirements.

- ✓ **MAKE APPOINTMENTS**
- ✓ **TRACK RESULTS**
- ✓ **TEST RESULTS RECORDS**
- ✓ **VACCINATION RECORDS**
- ✓ **SHARED WITH QUIKPASS™**
- ✓ **RENEWED CONFIDENCE**
- ✓ **REAL TIME CHAT**

Some functions of app:

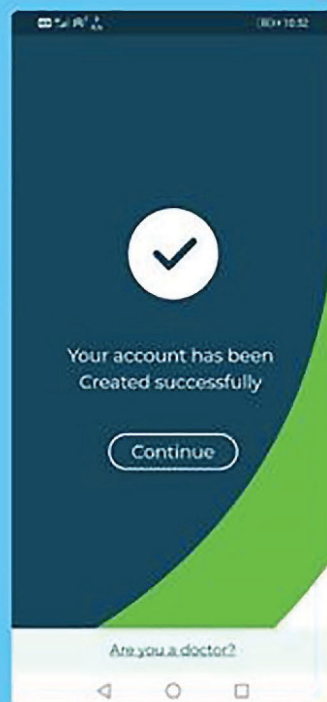

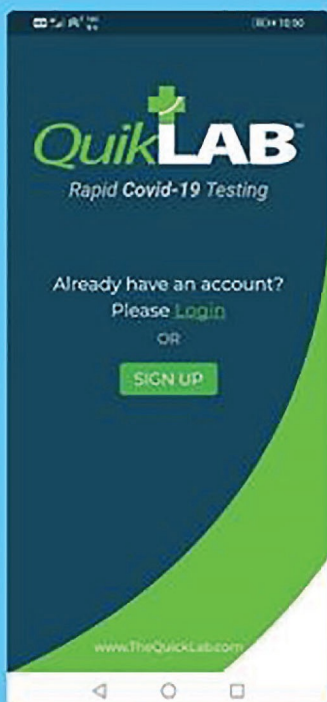

- User / Staff (Doctor) registration
- Location map of QuikLab sites
- UID QR CODE
- Scheduling booking an appointment (User) from time slots
- Review Appointments (Dr)
- Live message of the day
- Scanning QR CODE to start testing
- User questions asked from staff or Dr
- Test Start for user (Dr)
- Test Results ready (Dr)

- Test Results released from Dr to user with notifications
- Test logged in google cloud with several data points
- Test result log in user app
- Test result record
- Voice call only from Staff to user / user gets incoming voice call encrypted
- Video call only from Staff to user / user gets incoming video call encrypted
- Profile for user
- Profile for Staff / Dr
- Live real time chat User / Staff Dr (only after staff or Dr started the texting)

ADDITIONAL BENEFITS OF A QuikLAB™

- A Certified CLIA lab on site - Rapid results.
- QuikLAB's™ are a fully turnkey COVID-19 Testing Facility and can be added quickly and cost effectively. Operational within hours.
- Drive-thru or Walk-up QuikLAB's™.
- Requires a very small footprint.
- Provides a safety barrier prior to entering any facility.
- A quick and simple screening process that provides a safer environment for visitors, staff, customers and residents.
- Helps reduce your liability.
- Creates a safer environment that will help reduce the stress of visiting your facility.
- Any individual that is potentially infected is stopped before entering your facility.

A Two Part System for COVID-19 Test and Vaccination Verification

DESIGNED FOR FACILITY AND CONSUMER DATA REPORTING

QuikPASSTM Report inside the QuikLABTM App offers a user a way to view the full test report that can also be used for ACCESS with QuikPASSTM Check & Verify Partners like:

- ✓ Governments
- ✓ Airlines
- ✓ Restaurants
- ✓ Offices
- ✓ Building Entry
- ✓ Transportation Services
- ✓ Sporting Events

A QuikPASSTM partner will use the QuikPASSTM Check and Verify system to view a user's Test Status once the user has given a special 6 digit code present on the QuikPASSTM Report. The report is fully HIPAA Compliant and does not offer the QuikPASSTM agent any personal information. This will present the report with a valid time frame of use and status.

Some QuikPASSTM Check and Verify Partners might require a user to present a valid Government Photo ID for entry. On the QuikLABTM App, we offer the user a way to upload a valid Government photo ID on the user profile that is not seen by anyone unless the user selects a button on the full report to show ID. This will pop open an Alert on the QuikPASSTM Check and Verify report screen with the user's ID for 10 seconds only. The QuikPASSTM Check and Verify Partner can never select to see this and can only be presented by the user. If the user never elects to show ID then no one but the user can ever see the user's ID.

QuikPASSTM Check & Verify is a full stand-alone App on Android, iOS, and the Web which offers partners a secure way to check and verify the status of a person's test or vaccination.
